

Effortless Pairing. Rugged Design. Real Support.

After a year of thorough research and development, drawing on over 60 years of radio design experience from our acquisition of Jay Electronique, we proudly present Airmark, our all-in-one solution for the North American overhead crane market. Airmark offers effortless pairing, a rugged design, and dedicated customer care support. This simple, affordable, and efficient solution makes ordering and installing radios and receivers hassle-free. Engineered to meet the industry's needs, Airmark delivers significant improvements where other radio solutions fall short.

airmark
by Conductix-Wampfler

Unlike other overhead crane radio manufacturers, Airmark is the all-in-one, cost-conscious radio solution that includes the following at a standard price:

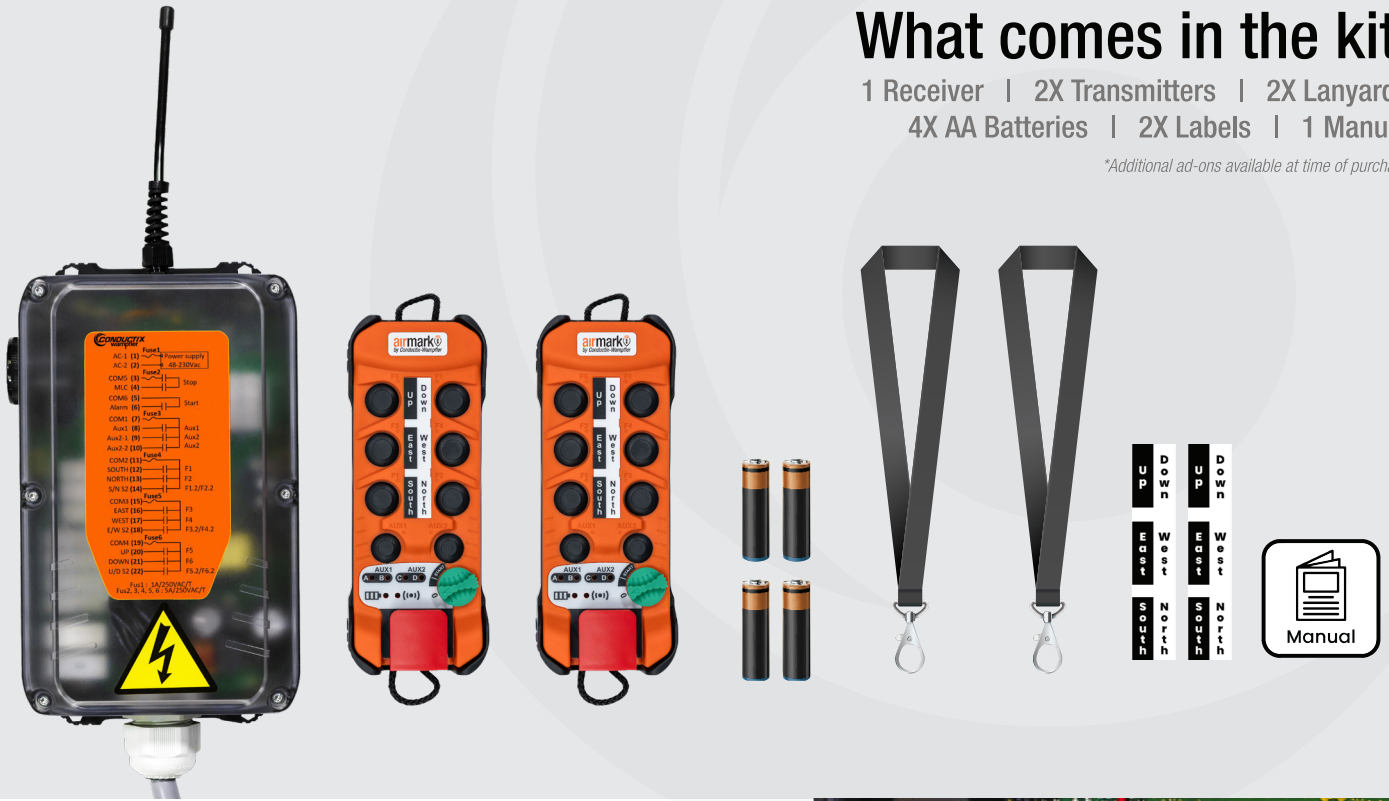

- Standard crane 3 motion 2 speed, Auxiliary Hoist, Tandem Hoist, Tandem Bridge
- Easy programming without a power cycle or access to the receiver
- Preinstalled indicator horn, light and antenna are included
- Automatic transmit power for maximum battery life
- Ergonomic primary and spare transmitter
- Automatic channel selection
- Pin code startup option
- Adjustable time out
- 2 Year Warranty

What comes in the kit:

- 1 Receiver | 2X Transmitters | 2X Lanyards
- 4X AA Batteries | 2X Labels | 1 Manual
